

MOCK DRILL –TERRORIST ATTACK

Terrorists are the worst type of threat faced by us in today's world. These merciless slaughters of humans are trained from childhood hours how to use guns and grenade rather than pencils and toys. They don't realize that a single bullet of their might take only a single life but it makes their loved ones living corpses and wake fear for life in hundreds.

Keeping in mind the need for awareness about how to act during any such attacks a mock terrorist drill was organized in our school on 25th April 2018.

A special type of hooter used only in case of a terrorist attack was blown. As soon as we heard the hooter we closed our classroom doors and piled benches against it so that it would be difficult for them to enter the room. Our teacher then told us to move away from the windows in case they start shooting blindly and to hide under respective benches. The whole class was under the spell of utter silence. After 15 minutes suddenly there were people (terrorist) banging doors in our wing and shouting for us to come out.

The chaos ensued for about half an hour after which it was announced safe to come outside our classrooms. We came face-to-face with the terror the people who have been through such attacks would have felt even though those attacking us were just defense personals pretending to be terrorists and meaning no real harm to us.

This experience was both thrilling and terrifying at the same time.

FIRE SAFETY-A REPORT-15/04/2019

All government departments observed fire safety week as per instruction given by government. In our school Army organized different activities related to fire safety especially mock drill for sudden fire on 15-04-2019. In the beginning Principal gave brief introduction of guest then Army officers and staff gave informative demonstration on different extinguisher and they also explained students about all type of fire (solid, liquid, and gas) and their causes and control mechanism. They concluded their demonstration with quote "*fire is a good servant but bad master*" After this demonstration a fire safety mock drill was organized which aimed at evacuation of school in case of sudden fire?

All students and teacher participated in the drill enthusiastically. We succeeded in evacuation our school within 5 to 7 minutes and promised authority for faster evacuation in next drill.
